

Whether it's helping you streamline your office procedures or design and implementing your network security plan, Bizgrok Inc provides personal attention to you and your business or organization.

We will create or update your print media, adapt it to develop your new website or redesign an existing one.

Our approach is flexible, sometimes handling projects from start to finish and other times using manuscript materials, photography, and graphics supplied by our clients in our web and marketing designs. When needed, we augment our project teams to include hardware specialists, programmers or photographers with whom we have longstanding associations.

Bizgrok is committed to providing superior service and support to the business and non-profit community. We have the experience and expertise to support the growth of your business or non-profit organization.

PROFOUND AND  
INTIMATE WAY

## Internet Services

### Dialup Access

Bizgrok provides Business class local and nation-wide Internet Access through major Internet Providers.

**Over 3000 nationwide numbers are available** to all Bizgrok Dial-up customers **without additional charge.** 56K dial-up access is billed at \$59.85 per quarter or discounted for annual pre-payment at \$230 for our Business customers. One-time setup fee is \$20. Static IP service is available for most dial-up accounts.

*Quick, Easy & Affordable*

### Intranet

Almost every organization has at least one employee who has all the answers, knows the agency history, where to find everything in the files, can tell you how to get to important places, and knows all the best contacts. While this sort of valuable employee will never be replaced by technology - the information that is so valuable can be more widely available to your general staff via your secure intranet.

An intranet site can be one of your organization most valuable tools. Consider this: **one place, available to everyone, from any place, at any time**, to find Contact & Approved Vendor Information, Sales Information, Schedules, Alerts & News, Office Forms, Policy & Personnel Info, Training & Help Desk Tip Sheets and much, much more.

Bizgrok can build your site, codify your forms, and consult on security issues. Give yourself new "office" space with no packing!

## Bizgrok Web Services

### Web Hosting

Bizgrok Hosting provides reliable service, and expert technical know-how. Bizgrok will help you plan and build your web presence. Start with a solid foundation of intelligent, thoughtful domain hosting, and reliable web hosting service. Domain email & BizCard™ will help you establish your professional web identity. All web hosting is done via our Linux based high-performance web servers

We can register your domain, provide domain name service, host your site and applications and provide you with statistics to track your sites performance, stability and reliability.

### Email Services

We will access your company's email needs, and offer you a secure, solution that will enhance your professional presentation and communication. We can manage your email for you, or backup your people onsite.

### Bizgrok Web Design

We will create your first web site, update your existing site or completely redesign of your current site. We'll edit your photos and graphics, or create graphics customized to your needs. Our sites are designed to degrade gracefully. We follow handicap Accessibility guidelines whenever possible. Check out our portfolio at <http://bizgrok.com/biz/portfolio/>.
